

Mission Statement

Build a student driven non-profit company that crushes the stigma attached to mental health, channel student creativity to spread the message of acceptance, and the development of relevant skills for today's economy.

Our Story

Ocean Academy is an Arts Integrated school where students are motivated and challenged to achieve their academic potential and learn to effectively navigate emotional and behavioral needs. We provide a dynamic, comprehensive education designed to support students and equip them with an expansive toolbox. As a program of Ocean Mental Health Services, we also provide a strong therapeutic component, including a continuum of behavioral health services that puts the mental health and needs of our community first, one life at a time. Creating the environment that exists today meant cultivating a safe place, creating a culture of respect and constructive exploration that is the foundation of our learning process. We are deliberately creating an environment where students operate in an open and honest fashion; where student voices are amplified not nullified.

Appropriation of Funds

10% of all sales go to our student artists; all other proceeds are reinvested into our arts and therapeutic programs.
