Tin Man Brewing Company is focused on building and cultivating a knowledgeable, responsible, and thriving craft brew culture in Evansville, IN.

And as a new brewery, we feel it is important to be an Earth friendly business. Our Mash Filter system helps us conserve both energy and water. This type of filter uses about 40% less water and 15-20% less natural gas than a traditional Lauter Tun. Tin Man is the first craft brewery of it's size in the United States to use this system.
