

# BREAST RECONSTRUCTION AWARENESS DAY

Intermountain Cancer Center  
St. George

OCTOBER 20<sup>TH</sup> 2023

11:30 A.M. TO 12:30 P.M.

19%

of women understand that the timing of their treatment for breast cancer and the timing of their decision to undergo reconstruction greatly impacts their options and results.

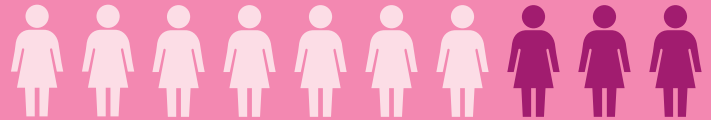

**Microsurgical Breast Reconstruction** using a patient's own tissue (such as the DIEP flap) is the gold standard for reconstruction.

**Regardless of radiation, breast reconstruction is usually an option.**

7 IN 10 WOMEN

are not aware of their breast reconstruction options following mastectomy.

**The Women's Health and Cancer Rights Act of 1998**

requires health insurers to cover the cost of breast reconstruction following mastectomy in all 50 states.

## BRA DAY EVENT
