## **MISSOULA'S ANNUAL CHIP SEAL PROGRAM BEGINS**

### **City continues 23 years of proactive street program**

Expect to see City of Missoula Street Division crews out applying oil and chips to Missoula streets beginning Monday, July 16.

It's the start of the City's annual Chip Seal Street Maintenance Program. Each year, about 100 blocks of street surface get the sealing treatment using the chip seal method. The combination of oil and chip – clean, crushed stone of a uniform size -- seals the asphalt surface from weather erosion and extends the life of the pavement in the same way as painting a home. This helps prevent the development of potholes. Sealing streets delays reconstruction and saves dollars and disruption for Missoula's residents, as sealed streets hold up better in Missoula's fickle winter weather.

The City initiated the annual program in 1987. In the 23 years of this street-sealing maintenance program, City crews have sealed a majority of the streets, many of them multiple times.

Residents can help the chip seal process go smoothly. Please do not run sprinklers in the street the day before or the day of chip sealing; streets must be dry. Drive slowly the first two days and refrain from making sharp turns. Park away from the street being chip sealed. Cars will be towed, usually to within one block. Do not walk in the chip seal material, or remove shoes if you do. It will not come out of carpets.

Crews will work Mondays through Thursdays 7 a.m. to 5 p.m. The chip seal project is expected to finish around Aug 2. The loose “chip” rock will be left on the street for an additional two to three weeks until street sweepers can clean up the chips. For the next year, the treated street will have a rough surface due to the rock chips and will also have some loose chip rock, which will eventually be cleaned up. The streets benefiting from this year’s chip seal surfacing are listed below in a tentative order in which they will be completed. Weather and/or workload could change the scheduling.

Jordan Court	All
Geraldine Court	All
Victor Court	All
Victor Place	All
Brusett Drive	All
Coburg Lane	All
