Missoula City-County Health Department Announces Form For Frontline Health Care Workers Seeking COVID-19 Vaccinations

Today, the Missoula City-County Health Department (MCCHD) launched a new submission form to help us identify and schedule appointments for frontline health care workers in the community who have yet to receive COVID-19 vaccinations.

Montana's Department of Health and Humans Services (DPHHS) says medical providers who come into direct contact with patients are eligible to be vaccinated in Phase 1A. The health department's form is designed to help individuals determine their eligibility and get on the Missoula City-County Health Department's vaccination list.

We kindly ask that health care workers who already have COVID-19 vaccination appointments scheduled elsewhere do not fill out the form. Individuals signing up to be on multiple vaccination lists may slow down the county's ability to complete Phase 1A as fast as possible.

The survey can be accessed through this [link](#), or it can be found at missoulainfo.com under our [vaccination page](#).

We would also like to remind everyone that even as the first members in our community get vaccinated, taking precautions against COVID-19 is still critical to the health of the community. We appreciate everyone's continued diligence with wearing masks, social distancing, and frequently washing their hands.
