All of us have been affected by the premature death or serious illness of a Vietnam Veteran who was exposed to deadly dioxins (Agent Orange). The intent of replicating this powerful monument is to acknowledge the veterans faithful and honorable service to our country and to also remember their family's unimaginable loss, grief, and suffering.

This monument will be permanently placed in our new state veteran's cemetery located in Pike Lake, Minnesota. It shall forever stand as a reminder to posterity of the true courage, strength, and resilience of ALL our Vietnam veterans who selflessly served their country.
