

of the bed partially under the bed. Her panties and bra were on a stack of dirty clothes against the wall on the right side of the bed.

Lavergne was asked if he had touched the phone at anytime and he answered no. When asked if there was any reasons for his fingerprints to be on the phone, he answered no.

Investigator Alderson was asked if Lavergne would be printed. She advised that he would. She was asked if she could get an extra set of prints because the victims prints were not found on the phone.

After Alderson left the room, Lavergne volunteered that he may have picked up the phone and placed it somewhere during the struggle. That would account for his prints being on the phone.  
Note: Both phones were found on the floor.

Lavergne signed a permission to search form that was furnished by CID. After signing this form, investigating officer, along with Lavergne went to a parking lot on Georgia Ave in Fort Polk and examined the contents of his 93 Ford P/U bearing La S074500.

After examining the truck, officer went to Lavergne barrack and retrieved the clothing that he had been wearing the previous night.

The victim was taken to her family Doctor for an examination. The doctor report, including descriptions of bruises and evidence of hands being tied, will be made part of this report.

Also, during the search of the victims residence, a wash cloth with a sticky substance was found in the bathroom. The substance is suspected of possibly being semen. This cloth will be sent to the Acadian Crime Lab for testing and possible comparison to samples from the suspect.

Respectfully Submitted:

Det. Joseph W. Demoruelle  
Evangeline Parish Sheriff's Office
